

5 Financial Benefits of Rehabilitation Partnership

Amid the ever-changing healthcare landscape, rehabilitation partnership is a proven strategy to strengthen service lines and improve access and the overall patient experience.

2 Increased Care Efficiency to Reduce Readmissions

REHOSPITALIZATION CREATES:

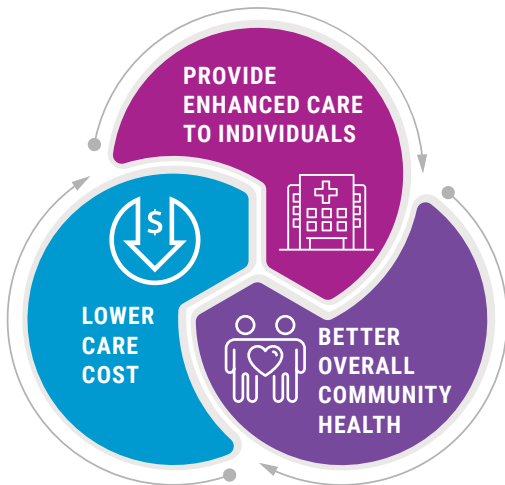

- ↓ Patient satisfaction
- ↓ Care quality
- ↓ Financial performance

OUTCOMES WITH A STRATEGIC PARTNER

- Faster recovery times +
- Reduced care costs +
- Improved patient experience +
- Lower readmission risk +

4 Supports Medicare's "Triple Aim"

1 Improved Performance Under Value-Based Care

The shift to value-based care has pushed hospitals to reduce spending while improving quality and outcomes. When a hospital partners with a post-acute expert it generates a successful downstream effect:

3 Specialized Care for COVID-19 and Medically Complex Patients

Patients who undergo facility-based rehabilitation care following a COVID-19 diagnosis experience improved outcomes and satisfaction.

5 Streamlined Patient Care Path

A suitable partner will have proven experience identifying the right patient at the right time in their care journey to benefit from rehab - keeping them within the hospital's care continuum.
